

VIGNESH E

Senior Associate Consultant | React.js, Next.js & JavaScript | Appian Plugin Development

+91 9629677046 | vigneshce2020@gmail.com | [LinkedIn](#) | [Portfolio](#) | Karur, Tamil Nadu, India

SUMMARY

Frontend Developer with 4+ years of experience building scalable web applications using React.js, Next.js, JavaScript, and Java. Skilled in developing reusable UI components, integrating REST APIs, and delivering responsive, high-performance user experiences. Also experienced in Appian plugin development and SAIL interface development, having built custom plugins and declarative UI components for enterprise low-code applications. Appian Certified Associate Developer.

SKILLS

React.js • Next.js • JavaScript (ES6+) • HTML/CSS • Java • REST API Integration • Appian Plugin Development (SDK) • Appian SAIL (Declarative Interface Development) • Appian Low-Code Platform • Adobe Experience Manager • Performance Optimization • Feature Flags & Progressive Rollouts • Design Systems / Pattern Libraries • Unit Testing (React Testing Library / Jest) • Git

WORK EXPERIENCE

Associate Consultant — Infosys

Jan 2025 – Present

- Develop and maintain customer-facing React.js/Next.js applications, building new features, integrating REST APIs, and optimizing performance for a telecom platform.
- Contributed to and maintained NUI, a shared design-system pattern library used across multiple repositories; shipped features behind feature flags for safe, staged rollouts, backed by React unit tests.
- Delivered a new account billing page with no reference test data — built directly from design schema/variants, validated via feature-flagged production testing, and shipped on schedule.
- Created comprehensive unit tests for React components to improve application reliability and safeguard against regressions.

Associate Programmer — WNS-Vuram

Jun 2022 – Jan 2025

- Developed custom Appian plugins and REST API/web service integrations (Connected Systems, Functions, Smart Services) using Core Java, with UI components built in JavaScript/React.js.
- Built Appian SAIL interfaces and reusable components for enterprise low-code applications, translating design requirements into declarative, maintainable interface definitions.
- Researched feasibility and produced time/effort estimates for new plugin development; optimized existing plugins for performance and responsiveness under load.
- Mentored junior developers and provided production troubleshooting support.

Intern — WNS-Vuram

Jul 2021 – Jun 2022

- Trained in Appian development; assisted senior developers on plugin development, testing, and debugging, and built a basic Appian application to reinforce platform fundamentals.

SAMPLE PROJECTS

- Telecom Account Billing Page (React.js/Next.js) · Scanner Component (JavaScript) · Capture Image Component (React.js) · System Integrations using REST API (Java).

CERTIFICATIONS

- Appian Certified Associate Developer · React JS — The Complete Guide 2024 (Udemy)

EDUCATION

B.E., Computer Science and Engineering

M. Kumarasamy College of Engineering, Karur | 2018 – 2022 | 8.47 CGPA
